EDUCATION

Illinois Institute of Technology, Chicago, IL May 2026
Master of Computer Science with specialization in Business

Vellore Institute of Technology, Bhopal, India May 2024
Bachelor of Technology in Computer Science

INTERNSHIP EXPERIENCE

Prembly - Data Analyst Intern Oct 2025 – present

- Analyzed lead and campaign performance data using SQL, Excel, and Power BI to identify trends and improve lead conversion strategies and applied python for data analysis and explored machine learning and NLP concepts to extract insights from structured and unstructured data
- Design and maintain automated dashboards in Power BI and Excel to track performance metrics and implementation KPIs
- Collaborated with cross-functional teams to gather requirements, translate business questions into analytical metrics, and deliver actionable insights
- Create reports and visual summaries to support ongoing projects and stakeholder communication

Vrinsoft Technologies - Business Analyst Intern, Gujarat Jan 2024 – May 2024

- Executed requirement analysis and created detail-oriented flow diagrams, SRS documents, and proposal drafts, reducing project delivery time by 20%
- Coordinated between clients and internal teams to resolve issues during implementation, achieving 95% spec alignment and reducing rework by 30%
- Tracked data trends with analytics tools, defined KPIs, and improved stakeholder visibility through daily updates, ensuring alignment across development phases

Qrious Tech Team - Frontend Developer Intern, Gujarat June 2023 – Sept 2023

- Developed and deployed responsive interfaces using ReactJS, increasing page load speed by 25% and user engagement by 15%
- Created reusable modular components that optimized the software development workflow, resulting in a significant 40% reduction in code redundancy and enhancing overall team productivity during project cycles
- Conducted usability testing, identifying and implementing improvements which resulted in a 10% increase in overall user satisfaction scores

PROJECTS

Analyzing Electric Vehicle (EV) Adoption Trends in Washington State April 2025 – May 2025

- Analyzed EV adoption in Washington State using regression, ARIMA forecasting, and clustering in R to reveal growth trends and infrastructure gaps
- Developed and validated predictive and clustering models in R, delivering insights on geographic, socioeconomic, and policy factors driving EV adoption

Advanced Hotel Management System Feb 2025 – Oct 2025

- Developing a responsive front-end using HTML, CSS, and JavaScript, and a back end with Python (Flask) and MySQL for efficient data management and seamless user interaction
- Designing RESTful APIs with Flask to connect the front-end with MySQL, enabling smooth data retrieval, storage, and dynamic functionality
- Improving application performance by optimizing SQL queries, ensuring cross-browser compatibility, and reducing load times for a smoother user experience

Machine Learning and NLP Dec 2024 – Jan 2025

- Implemented core ML and NLP algorithms, including Naive Bayes (from scratch), Logistic Regression, and sentence probability models, to demonstrate text classification and prediction capabilities
- Developed a basic word prediction language model using Python, scikit-learn, and NLP libraries (NLTK, spaCy), applying probabilistic methods for next-word prediction and sentence evaluation

SKILLS

- Languages:** Python, SQL, R, DAX, HTML, CSS
- Tools/Technologies:** Power BI, MS Excel, MS PowerPoint, Jupyter Notebook, RStudio, Tableau, Figma, GitHub, CI/CD
- Courses:** Marketing Strategy, Advance Database Organization, Natural Language Processing, Data Preparation and Analysis, Strategic Management, Probability and Statistics, Analytics for Decision Making
- Libraries & Certifications:** NumPy, Pandas, Scikit-learn, Tkinter, Fundamentals of Data Analytics, Learning Data Analytics 1
